(54) PICTURE PROCESSOR AND STORAGE MEDIUM**(57) Abstract:**

PROBLEM TO BE SOLVED: To apply a dynamic effect to a still picture by as few processings as possible.

SOLUTION: A storage medium which can be read by a computer consists of a still picture data area 101 for storing still picture data, an effect information data area 103 for storing data which specifies picture a processing to be executed to the still picture and a procedure data area 104 for storing a dynamic processing procedure which dynamically executes the picture process-

ing to the still picture. The picture processor reads out data in the effect information area 103 and the procedure data area 104 and applies the picture processing to the still picture based on those data.
